

2900 Sepulveda

Two of our prefabricated water features, the Studiomaide Veil, were installed in the interior courtyard of a mix-use apartment complex in. The water features welcome visitors as they arrive on the premise: from the breezeway entry or as they step out of the elevator. Artfully site-integrated, the stainless steel basins are concealed inside concrete planters and covered with polished black river rocks.

Type

Two water veils in a courtyard

Materials

stainless steel, polished black river rocks.

Location

Culver City, CA
