

Arhaus Water Walls

Textured stone water walls create an inviting focal point at the new Arhaus showroom at The Promenade at Westlake in Westlake Village, CA. Featured within a staged outdoor living vignette, each 10 ft. wide wall is seamlessly integrated into the store's architecture, with water flowing down the stone surface from a subtle recessed reveal. A lower drip ledge enhances the sensory experience by accentuating the sound of falling water, while underwater lighting highlights the movement of water, bringing a calming ambiance into the space.
