

Bowmont Water Veil

This handsome Water Veil stands 9 ft. wide by 14 ft. tall, set in between the pool deck and the driveway of a contemporary home in Beverly Hills, California. Water flows down the translucent stainless steel screen into a narrow basin lined with polished black river rocks. The water feature complements the steel and frame modern architectural style of the home, while LED lights showcase the relaxing water patterns creating a natural and soothing atmosphere for the property, during the day or night.
