

Brentwood Residence

Designed using alternating shapes and textures, this triptych paneled water wall is situated in a courtyard in a private residence in Brentwood, CA. Approximately 4 ft. wide by 8 ft. tall, the outer-concave surfaces of the water wall are smooth, while the contrasting center-convex surface is textured. Built with ridged and polished copper with bronze patina finish, and crushed glass pebbles at its base, this water feature produces richly colored, and interesting water patterns as it cascades down.
