

Glendale Adventist Medical Center

A recently completed project at the Glendale Adventist Medical Center stands an impressive 20 ft. tall, with a curved Water Veil that rises from a half-circular polished stainless steel basin with a perfectly still granite reflecting pool at its base. Water falls down the translucent stainless steel screen in hypnotic cascading waves. The bold design is surrounded by amber and sepia shaded tiles, complimenting the rich water hues that are the central focus of this beautiful and soothing water feature. Powerful color-changing LED lights illuminate the tall water feature from the inside out to symbolically illustrate the healing power of water.

Type

Curved water veil sculpture with reflecting pool

Materials

stainless steel, polished granite

Location

Glendale, CA
