

Glendale Adventist Medical Center

The feature at the Glendale Adventist Medical Center replaced a non-functioning lobby fountain. The 20 ft. tall curved Water Veil rises from a half-round polished stainless steel basin with perfectly still granite pool of water. Water falls down the translucent stainless steel screen in cascading waves and continues to fall down the curved polished stainless steel surfaces. Powerful color-changing LED lights illuminate the tall water feature from inside to symbolically illustrate the healing power of water.

Type

Curved water veil sculpture with reflecting pool

Materials

stainless steel, polished granite

Location

Glendale, CA
