

H.E.B Cafe Mueller

Water Studio completed a radiant and colorful water feature for a newly opened HEB grocery chain in Austin, TX. Adjacent to a charming outdoor patio, the water feature incorporates seven custom-made lucent glass panels that form an 8 ft. arch over the entrance to Cafe Mueller. Water flows down the laminated colored glass into a concrete basin, flanked by three small bubbling fountains on either side. This architectural water element doubles as a translucent enclosure for the courtyard, as well as a beacon for the store and cafe.
