

Huntington Pavilion

A curved Water Veil with translucent stainless steel wire screen displays mesmerizing water textures continuously falling into a basin covered with polished black river rocks. The water feature stands on top of a raised planter surrounded a curved bench. In the concave side of the curved water wall, an overflowing black granite pool reflects the surrounding light and creates a gentle sound of water falling on river rocks.

Type

Curved Water Veil for a hospital lobby

Materials

stainless steel screen, brass with bronze patina

Location

Pasadena, CA
