

Luxe Courtyard Fountain

This urban fountain doubles as a garden planter in a courtyard of a luxury apartment building located in Los Angeles, CA. The cool blue water is mirrored in the outdoor feature's design made of brushed stainless steel, and pale blue, gray and green colored mosaic glass tiles. Water spills out of 3 stylish stainless steel scuppers that flow below to polished beach stones set in the metallic basin. Submerged LED lighting is positioned to highlight the water pouring down alongside the intricate tile work. Rectangular courtyard fountain with scupper spouts
