

## Playa Del Rey Residence

This stunning glass rain tower, approximately 1 1/2 ft. square by 8 ft. high stands within a pool in the entry courtyard of a private residence in Playa Del Rey, CA. To complement the design of the rain tower, as well as light the entry pathway, we also designed a series of low-height square water sculptures that float above the water in the surrounding pools.

### Type

Multiple water sculptures for a contemporary home

### Materials

glass, stainless steel frame, basalt

### Location

Playa Del Rey, CA
