

## Rosa Mexicano II

Water Studio worked with CalAsia Construction to build the new mosaic-tiled water wall at the Rosa Mexicano restaurant in San Francisco. The multi-colored water wall is over 30 ft. wide and is the main focal point of the newly-opened restaurant. Cascading water runs down the iridescent glass tiles and behind 119 diver figures that are positioned in a diving motion.

### Type

Large mosaic-tiled water wall

### Materials

Mosaic Tile

### Location

San Francisco, CA
