

Topson Downs

Approved by the Cultural Affairs Commission as fulfilling Culver City's Art in Public Places Program requirements, the water feature is a wall mounted copper relief that floats above the reception area. Approximately 9 ft. wide by 6 ft. tall, the water wall is composed of five stepped vertical copper panels, with irregular machined ridges that create visual texture and balance to this artistic and stunning water wall sculpture.

Type

Public art water wall sculpture

Materials

machined copper with bronze patina

Location

Culver City, CA
