

Unical Aviation Lobby

Spanning the lobby's entire main wall in a corporate headquarters, this black granite water wall's aesthetic impact is comparable only to its incredible scale. At a width of 19 ft. and a height of 27 ft., the wall fills the viewer's visual extents while climbing or descending the glass-treaded staircase. Underwater lights at the base and recessed lights in the ceiling enhance the gently cascading waves of water. A remote pump and filtration system with ultraviolet light water treatment is utilized to provide a perfectly functioning water feature that will become the focal point of the lobby.

Type

Large scale water wall at corporate headquarters

Materials

ridged and polished black granite

Location

City of Industry, CA
