

Kennedy Wilson Courtyard

The backdrop of this lovely contemporary courtyard is a grand 32 ft. wide textured granite water wall. Located in a prestigious Beverly Hills, CA office building, the water feature consists of 2-inch thick custom fabricated granite slabs, with underwater LED lights that illuminate the wall to accentuate the water textures and movement. A custom fire pit with automated controls was also co-designed and installed in the courtyard to provide a welcoming tranquil lounge area for the employees and visitors.
