

Miami Beach Residence II

Approximately 14 1/2 ft. wide by 1 1/2 ft. tall, this unique fountain is perched within a residential penthouse on Miami Beach overlooking the sea below. The stone surrounding the pool and the slab floating in the center of cascading water is bush-hammered thassos stone. The fountain is just one of several water features created by Water Studio for this contemporary residence.

Type

Reflecting pool

Materials

bush-hammered thassos stone

Location

Miami, FL
