

Unical Aviation Fire

The water feature in the courtyard of Unical Aviation in California consists of an 18 ft. tall column of fire burning inside two curved Water Veils with water falling down the translucent stainless steel. The interlocking veils rise from a round reflecting pool that continuously overflows over textured basalt, creating a circular wall of white water. A cloud of fog surrounds the veils, emphasizing the primal elements of the feature. A series of white LED lights illuminate the water effects, and playful laminar jets interact with viewers walking near the lower pool.

Type

Water & fire feature in court yard

Materials

stainless steel, stone

Location

City of Industry, CA

Architect

Empyrean
