

Casa Mira View

Set in the courtyard entrance of the Casa Mira View apartments in San Diego, CA, this fire and water feature creates a dynamic focal point. Water cascades down the vast 25 ft. and 15 ft. curved bronze patina water veil towers. Water gently falls from these sculptural towers and enters a large 12 ft. circular basin below with under water lighting. Fire emits from the side structure of the largest tower illuminating the night's sky.

Type

Sculptural towers with bronze patina finish a fire / water feature

Materials

copper, stainless steel, concrete, polished river rocks, basin lighting

Location

San Diego, CA
