

Manhattan Beach Residence

Newly completed, this striking water sculpture was recently installed at a private residence in Manhattan Beach, CA. Water falls down the 7 ft. tall copper water wall and falls into a 5 ft. tall reflecting pool covered in black granite and dark copper. Water continues to cascade down the two smooth copper surfaces and falls into a recessed catch basin covered with river rocks. A polished stainless steel ring floats on top of the reflecting water to complete this tranquil water feature.

TYPE
Interior Water Sculpture with Pool

MATERIALS
Stainless steel, copper

LOCATION
Manhattan Beach, CA
