

Beverly Hilton Hotel Water Wall

The black forest granite water wall situated in the conference center courtyard at the Beverly Hilton Hotel in Beverly Hills, CA makes a dramatic statement. The simple aesthetic of this 20 ft wide by 9 ft high water feature creates a lovely centerpiece to this outdoor space. The linear granite ledges vary in size and width, and adhere to the water wall to create an interesting sound and secondary water effect. The basin is filled with complementary polished beach pebbles, and an LED submerged lighting system.
