

Summitridge Copper Water Wall

This custom water feature stands an impressive 21 ft high, and is situated in the foyer of an estate in Beverly Hills, CA. The water wall is made of ridged copper with a patina finish, and is adjacent to the grand staircase of the home. The sculptural element of the water wall adds an eye catching focal point upon entering the residence, as well as producing a serene flow of varying water patterns that cascades down from the height of the second floor of the home.
