

The Boulevard

Located in a public courtyard at The Boulevard Apartment homes in Woodland Hills, CA, this water feature produces a peaceful and tranquil outdoor ambiance. The two coupled tapered Water Veils are made of a powdered stainless steel frame and mesh screen, allowing the water to translucently fall, making it visible from both sides. The water veils are 6 ft and 7 ft high, and lead to a basin filled with dry river rock, and LED lighting that highlight the continually relaxing water patterns flowing from above.

Type

Two curved water veils

Materials

stainless steel, river rock

Location

Woodland Hills, CA
