

Jean-Georges Lounge

Situated in the elegant lounge area of the Jean-Georges Waldorf Astoria restaurant in Beverly Hills, CA, this water feature is the focal point of this relaxing space. The water sculpture evokes a tropical rain forest, with its 6 multiple tree like water walls, bark inspired textures, and organic shapes, which combined create soothing sights and sounds of nature. The water effortlessly flows into a black recessed pool with submerged polished beach pebbles, and dramatic energy efficient LED lighting. The sculptural feature is made of copper, with a bronze patina finish, allowing these water walls to compliment several other Water Studio designed water features within the Beverly Hills Waldorf Astoria property.
