

## Playa Vista Park East

In the nearby community of Playa Vista, Water Studio has built more than dozen water features. Working with Holdenwater, we recently constructed a large elliptical-shaped concrete pond with three tiers of illuminated steps. Twenty programmable laminar jets with color changing LED lighting surround the pond to create beautiful arcs of water that fall into the pond. The water feature is located at one of many new urban parks in the Playa Vista development.

TYPE  
Reflective Pool Fountain

MATERIALS  
Concrete, beach pebbles

LOCATION  
Playa Vista, CA
