

Pacific Arts Plaza

Two infinity-edge granite pools with perfectly still water reflect the surrounding building and sky. Water falls down textured granite on two sides of the water feature in distinctive patterns collecting in the pool below. In the concave section of each water feature, a series of bronze spouts create vertical rows of rivulets that form a jewel-like curtain of water. Located at the Pacific Arts Plaza with a 1.6-acre outdoor plaza and sculpture garden by Isamu Noguchi.
