

Irvine Center Drive

A recessed ridged verde green granite water wall, 6 ft. wide by 10 ft. tall, stands behind the reception desk in an office building in Irvine, CA. The top of the water wall extends above the finished ceiling to give the appearance that the water is falling from the floor above. Accentuated with lights from below to showcase the interesting patterns of the flowing water pouring down, this feature creates a rich backdrop for this office setting.

Type

Recessed water wall behind a reception desk

Materials

Ridged verde granite

Location

Irvine, CA
