

## 2900 Sepulveda

Two of our prefabricated water features, the Studiomade Veil, were installed in the interior courtyard of a mix-use apartment complex in Culver City, CA. The water features welcome visitors as they arrive on the premises: from the breezeway entry or as they step out of the elevator. Artfully site-integrated, the stainless steel basins are concealed inside concrete planters and covered with polished black river rocks.

TYPE  
Frameless Water Veil

MATERIALS  
Stainless steel, beach pebbles
