

Casa Mira View

Set in the courtyard entrance of the Casa Mira View apartments in San Diego, CA, this fire and water feature creates a dynamic focal point. Water cascades down the vast 25 ft. and 15 ft. curved bronze patina water veil towers. Water gently falls from these sculptural towers and enters a large 12 ft. circular basin below with under water lighting. Fire emits from the side structure of the largest tower illuminating the night's sky.
