

Rosa Mexicano II

Water Studio collaborated with CalAsia Construction to build the new mosaic-tiled water wall at the Rosa Mexicano restaurant in San Francisco. The striking multi-colored water feature is over 30 ft. wide and is the main focal point of the newly-opened restaurant. Cascading water flows down the iridescent glass tiles and behind 119 diving sculptures that are posed in a mid-flight motion. The overall impact of this water feature creates a memorable and wondrous centerpiece to this modern upscale restaurant's dining experience.

TYPE
Interior Water Wall

MATERIALS
Mosaic tile
