

## The Boulevard

Located in the courtyard of The Boulevard in Woodland Hills, CA, this water feature produces a peaceful and tranquil outdoor ambiance. The two coupled tapered Water Veils are made of a powdered stainless steel frame and mesh screen, allowing the water to translucently fall, making it visible from both sides. The water veils are 6 ft and 7 ft high, and lead to a basin filled with dry river rock, and LED lighting that highlight the continually relaxing water patterns flowing from above.

**TYPE**  
Framed Water Veil
