

Luxe Courtyard Fountain

In the courtyard of a luxurious apartment building situated in Santa Monica, CA, there is an urban fountain that serves a dual purpose as a garden planter. The fountain features brushed stainless steel, along with mosaic glass tiles in shades of pale blue, gray, and green, reflecting the cool blue water. Three elegant stainless steel scuppers pour water, which gracefully cascades down into a metallic basin filled with polished beach stones. Submerged LED lighting illuminates the intricate tile work and the flowing water, creating a visually stunning display.
