

Frameless Water Veil for Downtown Los Angeles Office Lobby

Mesmerizing ripples of water emanate from a discrete slot in the lounge area ceiling of this sophisticated office space in Downtown Los Angeles. A line of LED light, recessed into the ceiling, highlights the water's texture traveling down the stainless steel screen. The water disappears into a bed of black beach pebbles bordered on two sides by a built-in marble bench that creates an ideal location to enjoy the peaceful sound and sight of this unique Water Veil. Measuring 16 ft. wide by 12 ft. tall the Veil is positioned in front of a large glass wall to promote multiple viewing perspectives from within the office.
