

## Pasadena Water Veil

Twelve brass spouts, set within a raised copper podium, pour rivulets of water that continuously fall in front of a nearly 8 ft. tall Water Veil located in the back-yard of a newly built home in Pasadena. This Water Veil is combined with a low-height rivulet feature to bring together the visual water texture effect with a tranquil water sound.

**Type**  
Water Veil

**Materials**  
Stainless steel, copper, granite
