

## Pasadena Motor Court Fountain

Made by master stone carvers in Italy this 9-foot-tall classical limestone fountain compliments the architecture of this Pasadena home. The fountain stands as the focal point of the motor court as water falls down the multi-tiered sculptural elements into a custom mosaic-tiled pool spanning 12-feet in diameter. Water Studio brought this feature to life using a modern piping and pump system with adjustable jets that shoot water from the intricately hand-carved flower sculptures below.

### Type

Exterior Water Fountain

### Materials

Italian Limestone, Tiles
