

Hotel Drover Exterior Water Fountain with Rivulets

Four smooth copper cube podiums with 13 rivulet spouts each span 21-feet of the exterior patio at the newly renovated Hotel Drover in Fort Worth, Texas. The rivulets pour water from two opposite sides of each cube creating playful criss-cross patterns and gentle splashing sounds. Water continues to flow down all four podium sides creating smooth endless waves that fall into a bed of Mexican beach pebbles. Topped with ceramic planters the fountain is the centerpiece of the hotel's front entryway.
