

Rivulet Water Feature

Spanning 26 ft. wide this water feature creates a stunning focal point for a Hobe Sound, Florida private estate. A curtain of 115 brass spouts forms individual rivulet streams that line the edge of the narrow reflecting pool, gently pouring water into the lower basin. The feature is illuminated from below with a continuous LED lighting strip. This dynamic water feature brings the sound and movement of water to a backyard seating area overlooking the ocean.

Type

Rivulet Fountain

Materials

Brass, stainless steel

Location

Hobe Sound, FL
