

Irvine Two Story Water Veils with Sculptures

Frameless water veils cover columns that extend two stories of this commercial office space located in Irvine, CA. The lower level veils are complemented by triangular copper water sculptures. Each sculptural podium, standing approximately 3 ft. tall from the finished floor, has an upper granite pool that spills over on all sides, flowing into basins clad in porcelain tiles. To enhance the ambiance of this unique lounge area, the front edge of each triangular podium features spouts that pour individual rivulets, creating the soothing sound of falling water.
