

Jean-Georges Beverly Hills Rivulets

The graceful water feature creates a subtle relaxed elegance in the lush garden of the famed Jean-Georges Waldorf Astoria restaurant in Beverly Hills, CA. Situated prominently to be seen from multiple vantage points, the water feature with its sophisticated curved design, and multiple rivulet spouts produces a contemporary, yet classic outdoor focal point. Made of copper with bronze patina finish, the fountain has 30 rivulets of water that gently stream into a recessed pool with submerged beach pebbles, and energy efficient LED lighting.
