

## Jean-Georges Beverly Hills

This water feature is the focal point of the elegant lounge area of the Jean-Georges restaurant in Beverly Hills, CA. Evoking a family of sculptures with six different and complimentary forms, the combined water sculpture creates the soothing sights and sounds of moving water. Water effortlessly flows into a dark pool with five bubbling nozzles and underwater lighting. Made of copper with a bronze patina finish, this feature compliments several other Water Studio water features within the new Waldorf Astoria Hotel in Beverly Hills.
