

Bronze Rivulet Fountain

The motor court water feature at this private estate in the western hills of Bel Air, CA stands nearly 5 ft. tall with two tiers of overflowing sculptural bronze pools. The lower tier measures 6 ½ ft. in diameter and features custom-fabricated spouts that create rivulets of falling water. The frothy cascade nozzle at the top of the 5 ft. diameter tier provides additional water effect and movement. Underwater lights illuminate the rivulets to offer a dramatic welcoming experience.
