

RU Health Water Feature

A copper runnel, consisting of three stepped segments, culminates with a circular pool surrounded by a gracefully curved water veil at the Riverside University Health System Medical Center in Moreno Valley, CA. Spanning a length of 20 ft. across a landscaped bed, the water cascades over dark grey basalt tiles etched with the inspirational words "Love," "Hope," and "Courage." The curved water veil, standing at a height of 10 ft., features textured water waves that flow continuously down its transparent surface. The tranquil and meditative ambiance invites patients, visitors, and staff to savor a quiet moment of reflection.
