

## Cross Creek Ranch

Water Studio designed two water features for the Cross Creek Ranch outdoor shopping center in Malibu, CA. This entry feature is a dynamic, multi-level experience designed to welcome visitors with vibrant bubbling nozzles and flowing water cascading down stepped concrete levels. Spanning 24 ft., the installation consists of six interconnected geometric pools. In the evening, our lighting design, featuring illuminated nozzles and linear strip lights, enhances the water's movement, transforming it into a radiant landmark. The water feature creates a striking entrance for this stylish development, using the captivating power of water to invite visitors to explore, drawing them in to take a closer look at the feature and discover the many shopping and dining opportunities.
