

Linear Infinity Edge Fountain

A sleek, 12 ft. long linear infinity-edge water feature brings life to the outdoor patio of this Palm Springs residence. Standing 16 in. tall, it showcases three bubbler nozzles that create elegant wave patterns across its surface. Water gently cascades over the edge into a modern grey basin, producing the soothing sounds of falling water. This captivating feature is visible from both the interior living area and backyard, blending light, sound, and movement to elevate the serene ambiance of the desert landscape.
