

Genesis Design Studio

A stunning copper podium anchors the entry foyer of the newly completed Genesis Design Studio in El Segundo. Designed to transcend the conventional office experience, the state-of-the-art facility offers visitors and designers thoughtfully curated environments that inspire both focus and creativity. Our 25 ft. water feature evokes a sense of calm upon arrival. Water cascades from an upper reflection pool, its movement accentuated by the rich, dark brown patina of the copper surface. Through the water, glimpses of Sonora Shiners pebbles offer a natural contrast to the rectangular podium shape. Perimeter strip lighting casts a warm glow, highlighting the rippling textures and enhancing the tranquil ambiance of the space.
