

## Asante Rogue Regional Medical Center

A striking water feature enhances the expansion of Asante Rogue Regional Medical Center in Medford, OR. The experience begins with a 12 ft. honed black granite podium, where streams of water flow in a shimmering curtain down both sides. From there, a 42 ft. stainless steel runnel carries the water gently across polished granite tiles before it plunges 4 ft. into a circular, boulder-lined pool. Illuminated by underwater lighting, the water feature creates a serene, welcoming atmosphere for visitors and staff alike.
