

Amgen Water Veil

A 10 ft. wide water veil brings a sense of tranquility to a second-level outdoor patio at Amgen headquarters in Thousand Oaks, California. Gentle, mesmerizing waves cascade 8 ft. down its transparent surface, clinging smoothly without splashing. The water flows gracefully over polished black beach pebbles, which line a powder-coated stainless steel basin. Designed with a double-sided frame, it offers seamless visibility from both directions, making it an engaging focal point from up close and afar. Visible from the ground level, the water veil also enhances the ambiance for people walking throughout the campus.
